Abramovici, Flavian, Mode theory versus theoretical seismograms for a layered solid .. 9

Ade-Hall, J. M., M. A. Khan, P. Dagley & R. L. Wilson, A detailed opaque petrological and magnetic investigation of a single tertiary lava flow from Skye, Scotland—I. Iron–titanium oxide petrology 375

Ade-Hall, J. M., M. A., Khan, P. Dagley & R. L. Wilson, A detailed opaque petrological and magnetic investigation of a single tertiary lava flow from Skye, Scotland—II. Spatial variations of magnetic properties and selected relationships between magnetic and opaque petrological properties 389

Ade-Hall, J. M., M. A. Khan, P. Dagley & R. L. Wilson, A detailed opaque petrological and magnetic investigation of a single tertiary lava flow from Skye, Scotland—III. Investigations into the possibility of obtaining the intensity of the ambient magnetic field (F_{ANC}) at the time of the cooling of the flow 401

Age dating of rocks:

——, Isotopic dating of the Roriama dolerites, Ian McDougall 141

Backus, George & Freeman Gilbert, The resolving power of gross Earth data 169

Bell, J. F., The measurement of the distance between Ethopia–Perim–South Arabia at Bab el Mandeb in 1965 January 317

Ben-Menahem, Ari & Sarva Jit Singh, Eigenvector expansions of Green's dyads with applications to geophysical theory 417

Blamey, C. & P. G. Gibbs, The epicentres of origin lines of some large explosions .. 1

Bolt, Bruce A., M. O'Neill & A. Qamar, Seismic waves near 110°: is structure in core or upper mantle responsible? 475

Book Reviews:

——, The Earth's Mantle 325

——, The Theory of Rotating Fluids 453

——, Sydney Chapman, Eighty, from his Friends 454

——, The New Universe 455

——, Annals of the IQSY. Volume I. Geophysical measurements: Techniques, Observational Schedules and Treatment of Data 455

Bullen, K. E., Compression in the Earth 31

Bullen, K. E., Empirical equations of state for the Earth's lower mantle and core .. 235

Cleary, J. R., C. Wright & K. J. Muirhead, The effects of local structure upon measurements of the travel time gradient at the Warramunga seismic array 21

Collinson, D. W., Ferrous and ferric iron in red sediments and their magnetic properties 531

Dagley, P., J. M. Ade-Hall, M. A. Khan & R. L. Wilson, A detailed opaque petrological and magnetic investigation of a single tertiary lava flow from Skye, Scotland—I. Iron–titanium oxide petrology 375

Dagley, P., J. M. Ade-Hall, M. A. Khan & R. L. Wilson, A detailed opaque petrological and magnetic investigation of a single tertiary lava flow from Skye, Scotland—II. Spatial variations of magnetic properties and selected relationships between magnetic and opaque petrological properties 389

Dagley, P., J. M. Ade-Hall, M. A. Khan & R. L. Wilson, A detailed opaque petrological and magnetic investigation of a single tertiary lava flow from Skye, Scotland—III. Investigations into the possibility of obtaining the intensity of the ambient magnetic field (F_{ANC}) at the time of the cooling of the flow 401

Dahlen, F. A., The normal modes of a rotating, elliptical Earth 329

Earth—general

——, Compression in the Earth, K. E. Bullen 31

——, The resolving power of gross Earth data, George Backus & Freeman Gilbert .. 169

——, The normal modes of a rotating, elliptical Earth, F. A. Dahlen 329

——, Eigenvector expansions of Green's dyads with applications to geophysical theory, Ari Ben Menahem & Sarva Jit Singh 417
